

BEAM CRAFT

RECENT PROJECT

Lewis Farms Fire Hall (City of Edmonton)

“We had Beam Craft on our site to do a unique job which included lifting 60’ long Glue Lam beams with a truss attachment into place which were a finished product. Beam Craft worked efficiently, quickly, safely and within the on-site conditions to install the beams. We were impressed with their preparation and attention to detail that led to us getting the beams into place on schedule.”

- Jordan Woods, Site Foreman, PEMCO Construction Ltd.

VALUE ADDED SERVICE:

- Complicated raising sequence of hybrid steel & glulam trusses
- Installation of steel cross members and Westdek system
- Special thanks to Western Arch Rib and Leder Steel.
